

Does Azerbaijan have a long-term energy strategy?

Azerbaijan has been working towards a long-term energy strategy for several years. As the oil and gas sector remains the backbone of the economy, the country has been looking to improve the efficiency with which it uses its energy resources.

What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

Where does energy come from in Azerbaijan?

Two-thirds of energy in Azerbaijan comes from fossil gas and almost a third from oil. Azerbaijan is a major producer of oil and gas, much of which is exported. Most electricity is generated by gas-fired power plants.

What is Azerbaijan's energy supply?

Azerbaijan's domestic total energy supply (TES) relies on natural gas (68% in 2020) and oil (31% in 2020). Natural gas is used to generate most of the electricity and heat in the country (over 90% in 2020). Fuel oil was phased out in the early 2000s, but had to be briefly reintroduced following the gas supply squeeze in 2015-2017.

How much energy does Azerbaijan produce?

Overall, Azerbaijan produces around four times the energy it consumes and has one of the highest levels of energy self-sufficiency in the world. In recent years, almost 90% of oil and over 40% of natural gas have been exported. Azerbaijan's domestic total energy supply (TES) relies on natural gas (68% in 2020) and oil (31% in 2020).

Which energy sources are used in the transport sector in Azerbaijan?

Most oil products used in the transport sector are produced in Azerbaijan. TFC consists mainly of natural gas (43%) and oil products (39%), followed by electricity (15%). Renewable energy sources, including hydro, contributed 1.5% to total energy supply in 2022 and 6% (1.8 TWh) to electricity supply.

Over the past few weeks, Sumitomo Electric issued three press releases about our power cable business that relate to renewable energy projects in Europe. The region now has a number of large-scale projects, ranging from tens of billions to hundreds of billions of yen in investments, that require products such as submarine cables for offshore ...
