

Does Nauru have an energy road map?

Currently Nauru is working on an Energy Road Map, including action plans for the development of renewable energy and energy efficiency sufficient to significantly lower imports of diesel fuel for electricity generation.

Why is Nauru so vulnerable to solar energy?

Solar energy is the only proven renewable energy resource which could be utilised in short to medium term to reduce dependency on fuel imports for electricity generation. The country's vulnerability is also increased by its isolation from other Pacific Islands. In 2012, SPC released an energy profile of Nauru based on 36 energy security indicators.

What type of energy is used in Nauru?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Nauru: How much of the country's energy comes from nuclear power?

How can Nauru reduce its reliance on fossil fuels?

In order to achieve Nauru's ambitious goal of reducing the country's high reliance on imported fossil fuel by meeting 50% of its energy needs from renewable energy sources by 2015, the Nauru Government requested technical support from GIZ, SPC and IRENA in the development of a Nauru Energy Road Map in early 2012.

What is Nauru energy policy framework (Nepf)?

The Nauru Energy Policy Framework (NEPF) was endorsed in 2009 and layout broad aims and strategies for the energy sector, including power, renewable and energy efficiency. The NUC currently provides all electricity services to Nauru except for RPC and the main processing plant of RONPHOS.

How can we monitor progress towards Nauru's energy sector goals?

In order to monitor progress toward Nauru's energy sector goals and to plan for future energy projects, it is essential that accurate, timely, (reasonably) complete, consistent, up-to-date and accessible database collected, stored and maintained regarding renewable energy resources, energy imports and energy use in Nauru.

Nauru Energy Road Map (NERM) 2018 - 2020 Nauru Energy Efficiency Action Plan 2008-2020 National Sustainability Development Strategy (NSDS) 2005-2025 ENERGY AND EMISSIONS Avoided emissions from renewable elec. & heat CO₂ emission factor for elec. & heat generation LATEST POLICIES, PROGRAMMES AND LEGISLATION Electricity generation trend

Clean Energy: BES will continue to support clean energy research that leads to reduced impacts from climate

change. The United States and the world face profound challenges due to climate change with a narrow window of opportunity to pursue action to avoid the most catastrophic impacts. As part of the Department's efforts to prioritize R& D
