

The company's smart grid solutions deliver real, quantifiable benefits and have proved pivotal to validating the case for smart grid investment. Itron's grid management solution provides utilities with a unified platform for managing the ever increasing complexity of the smart grid. 9. Hitachi Market cap: US\$74.37bn

Digital innovations are critical to meeting those challenges. And in myriad ways, Cisco is contributing to an energy future that's more sustainable, secure, and smart. "Utilities and energy are critical infrastructure ...

Cisco Smart Building solutions Build for the changing way we work Reimagine your workspaces. Create connected experiences built and powered by innovative, user-centric technology. Access design guides. Overview Resources. Elevate your space by ...

LADWP will install up to 52,000 Itron smart electric meters and 20 smart water modules that will operate over an integrated cellular and multi-application IPv6 communication network based on the Cisco GridBlocks(TM) architecture using Cisco Connected Grid routers and Network Management System.

Cisco Digital Utilities: Weitverkehrsnetze f&#252;r Energienetzebetreiber ... Grid and Infrastructure Segment, innogy SE. Cisco wurde als Vorreiter in der IoT/OT Cybersecurity benannt. The Forrester Wave: Industrial Control Systems (ICS) Security ...

In the following article, top managers from leading equipment vendors and solutions providers discuss the future of the smart grid industry. The article draws on interviews with Bob Gilligan, Vice President of Transmission & Distribution for GE; Laura Ipsen, General Manager and Senior Vice President of the Cisco smart grid

For example, Cisco has partnered with Italy's largest electricity provider, Enel, to introduce innovative solutions for agile grid operation, regulation, and supervision. Using Cisco technology, Enel can monitor its energy grid and preemptively address any faults or failures that threaten the network.

Cisco smart grid and network solutions help enable security, resilience, and operational efficiency. Power on Utilities are facing unprecedented challenges to maintaining supply and customer uptime To thrive in the new era, utilities need to connect and modernize grid operations end to end Leading utilities are turning to Cisco for a full range of solutions, ...

The Cisco multi-service FAN solution is based on a flexible two-tier architecture that generates IP network services such as security, quality of service, resilience, and management supporting use cases such as Advanced Meter Infrastructure (AMI), Distribution Automation, and work force automation. The Cisco FAN solution consists of three main ...

Cisco will provide solutions for efficient, IP-based backhaul communications for smart meters that will integrate proprietary solutions into the overall smart grid platform. Cisco's Home Energy Management and Business Energy Management solutions will help optimize energy demand, use and cost by providing greater access to data and analysis tools.

From the "it's time to get smart about power" files: The Smart Grid, the idea of transforming the century old electrical grid in the United States into a more efficient and optimized platform for electricity management and delivery is big business "s a business in which networking giant Cisco (NASDAQ:CSCO) is very interested in playing a key role.

Cisco Smart Grid is a holistic, cross-technology solution that enables utilities and other organizations in the energy industry to build secure, standards-based IP networks to efficiently meet the demands of energy generation, distribution, storage, and consumption. Cisco Smart Grid is a combination of products, technologies, services, and ecosystem partners that ...

LIBERTY LAKE, Wash.--January 17, 2012--Itron, Inc. (NASDAQ: ITRI) announced today that, in partnership with Cisco, it has brought to market their combined next-generation smart grid platform, delivering on the companies" vision to create a secure, scalable and multi-service IPv6-based communications architecture.

Cisco Utilities IoT Validated Design provides a grid security architecture for substation, distribution automation, AMI solutions that help you protect your grid from cyber threats. Scalability Millions of meters, hundreds of thousands of field devices, and service vehicles are quite common and need to be connected and managed by utilities in a ...

Multiservice data communications networks are essential to realizing the full potential of the smart grid. With Cisco &#174; industrial IoT solutions, utilities can get the data they need to improve the operational efficiency, safety, and security of the distribution power system. Field area networks are powered by the Cisco industrial routing and ...

SAN JOSE, CA and RALEIGH, NC - Sep. 18, 2012 - Cisco and Elster announced today that Elster will offer smart grid solutions for field area networks using Cisco's technology. The solutions will integrate the Cisco Connected Grid Endpoint reference design with Elster's EnergyAxis System, and will showcase the power and flexibility of Elster's Universal ...

Cisco, the networking giant, updates and extends its Connected Grid portfolio along with technology partner Itron; network interoperability will be its key competitive argument with utilities.. Ever since it got into the smart grid business three years ago, Cisco has been promising to network every part of the grid. Since then, we've seen it deliver on some pieces ...

De Wysocki highlighted Cisco's role in supporting organizations through this transition -- and doing it before climate change becomes irreversible. "The only way that we're going to mitigate the worst impact is to accelerate the transition to clean energy," she stressed. "To do that, we need a smart, secure, connected modern grid.

ScottishPower Renewables relies on Cisco solutions like CyberVision, Cisco Validated Designs for Power Utilities and Renewable Energy, and Cisco Ultra-Reliable Wireless Backhaul, ... I feel Cisco can be a critical enabler -- to that smart, modern, clean grid, powered by the network, and providing a ton of data and observability in a super ...

SAN JOSE, Calif. - January 17, 2012 - Cisco today announced additional solutions and services to its Connected Grid portfolio that will help utilities modernize the electric grid with built-in flexibility, security and interoperability enabled by the power of the network. Cisco's new technology architecture, solutions and related services address key utility concerns around ...

Cisco Smart Grid Services network solutions help enable security, reliability, resilience, and operational efficiency. Watch video (5:17) Read white paper; Request a 1-on-1 Demo; Read Blogs; See Customer Stories; Contact Us; ...

And our grid security solutions combine industry-leading cyber security with video surveillance to monitor physical security of remote locations - ensuring a comprehensive view. ... By extending Cisco's trusted network to their new smart services, utilities can leverage familiar technologies to easily connect and manage their entire ...

o Sense and prevent power blackouts by isolating disturbances in the grid Figure 1. Main Applications of a Smart Grid Source: Cisco IBSG, 2008 Grid Monitoring/ Management Smart Metering Smart Grid Applications Smart Grid Platform Demand-side Management Renewables" Integration Distributed, Intelligent Grid Management

LADWP will install up to 52,000 Itron smart electric meters and 20 smart water modules that will operate over an integrated cellular and multi-application IPv6 communication network based on the Cisco GridBlocks TM architecture using Cisco Connected Grid routers and Network Management System. In partnership with Cisco Services, LADWP will be ...

Cisco Connected Grid Services deliver clear and immediate benefits to the utility, cost- effectively controlling access to critical utility assets, monitoring the network, mitigating threats, and protecting physical facilities.
