

# Conditions for installing photovoltaic panels on the roof

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Can solar panels be installed on tiled roofs?

In conclusion, embracing solar energy through the installation of solar panels on tiled roofs not only helps reduce carbon emissions but also provides long-term cost savings. Start your journey towards a sustainable future by exploring the possibilities of fitting solar panels to your tiled roof today.

Can solar PV systems be installed on a pitched roof?

The guidelines also say that provision must be made for ventilation behind the solar PV modules to provide cooling. With the introduction of MCS012 in March 2012 we would now expect all MCS certified installers of solar PV systems to install solar PV systems on pitched roofs using only MCS012 certified roof fixings.

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m<sup>2</sup>, and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.

Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast.

### 3. Location of solar panels

How long does it take to install solar panels on a roof?

Installing ground-mounted solar systems requires special permits and allowances based on location, and the process can take from a few days to several months. Solar panels on roofs have ensured affordability and accessibility in solar energy usage. However, it is necessary to be aware of the precautions before installing. Here are a few:

Roof-integrated solar panel installation is a simple process with Marley SolarTile<sup>®</sup>; - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings. ...

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, ...
