

How did we help the Cook Islands Government achieve its aim?

We helped the government realise its aim. To support the Cook Islands Government, the New Zealand Government - through the Ministry of Foreign Affairs and Trade, installed mini-grid photo-voltaic power systems in a number of villages on six remote islands. We helped manage this logistically enjoyable project.

Is full-time power the future of Cook Islands?

Now with full-time power, the future has taken a new shape for Cook Islands' residents - an improved quality of life, and increased economy activity. The improved livelihood in the communities that now have the benefit of reliable, 24-hour power supply is immeasurable.

How many islands are in the Cook Islands?

The Cook Islands Located in the South Pacific Ocean, the Cook Islands has 15 islands, of which 12 are inhabited. Most of the Cook Islands 13,000 permanent residents live on Rarotonga, in the south. Aitutaki has a population of approximately 1,800, and remaining islands are sparsely populated. Fig 1.

An Act to Amend the Energy Act 1998. This act was prepared by the Cook Islands Government. These act is the energy amendment act 2012 and shall be read together with and deemed part of the energy act 1998. This act comes into force on the date it is assented to by the Queen's Representative. 2012, No.9.

An example of this, various studies from literature show that these renewable energy targets go from 50% globally in islands [1], 50% in Cozumel Island, Mexico [4], and 65% in Graciosa Island ...

As of 2022, the state of electricity consumption in the Cook Islands illustrates a balanced yet elementary mix of energy sources. Approximately half of the electricity generated comes from low-carbon sources, with solar energy contributing entirely to this segment. The other half is derived from fossil fuels, indicating that the Cook Islands is equally dependent on high-emission energy.

Achieving global clean energy objectives requires large new quantities of multiple metals. Moana Minerals, with involvement and support from local communities, meets this challenge through responsible sourcing of these metals from the seafloor nodules of the Cook Islands.

Energy. Cook Islands Renewable Energy Chart 2012, revised 2016 ... inventory, the Cook Islands emission was estimated at 69,574t CO₂ -e, which contributes 0.00012% of the 2004 global GHG emissions [11]. The energy sector alone contributed 79% of the total emissions for 2006, with 34% attributed to electricity generation. ... which will be ...

Action 4 - Financing o Design and implement energy roadmaps, such as a framework for funding priorities o identify a business model that ensures long-term sustainability, where revenues enable re-investment o Form project clusters to reach a scale that reduces transaction costs and fosters investment o Develop bankable project proposals that meet the quality criteria of leading
