

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

Could geothermal power plants be built in Croatia?

According to current conservative estimates, geothermal power plants with a total capacity of about 1 GW could be built at the Croatian geothermal sites identified so far. The tender documents will be published on the official websites of the ministry competent for energy and the Agency.

What is Croatia's solar energy potential?

"Croatia's solar energy potential estimated at 6.8 GW", Balkan Green Energy News. Retrieved 18 March 2022. ^Spasi?, Vladimir (10 November 2021). "Croatia to add 1.5 GW of renewables by 2025", Balkan Green Energy News. Retrieved 18 March 2022.

What percentage of Croatia's energy mix is renewable?

Renewable energies account for approximately 31.33% of Croatia's energy mix. Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity.

How many hydropower plants are there in Croatia?

Croatia has 28 hydropower plants of which 2 are reversible, 2 small size and 1 pumped storage. They are distributed in three production areas: North, West and South with one independent plant, and are HEP's most important source of renewable energy.

What data can the Croatian Hydrocarbon Agency provide?

Thanks to data from the oil industry, the Croatian Hydrocarbon Agency can offer concrete and initial data on potentially productive geothermal locations, and even existing wells for which we have data on water temperatures and reservoir permeability.

of Croatia, and thus will contribute to the achievement of Croatia's RRP milestones and targets. 8. 2 Commission decision C(2015) 6141 final of 1 September 2015 on SA.38406 (2014/N) - ...

Solar panels on a house in Croatia. UPDATED: 10.9.2024. Only 50% of Croatia's energy originates from its own sources. In reality, Croatia does not need to import energy as it has many natural sources that could be used ...
