Who is Rystad Energy?

Rystad Energy is an independent energy research and business intelligence company headquartered in Oslo, Norway.

What does Rystad do?

[4]Rystad was founded in 2004 by Jarand Rystad, a Norwegian physicist and earlier consultancy partner for McKinsey. [3][4]The company specializes in analysis of global energy issues, and has the sole comprehensive database for production data, engineering and financing of all oil and gas fields and deposits in the world.

What is the Rystad Energy Institute?

Our data and advisory services guide people at the forefront of building tomorrow's energy landscape. The Rystad Energy Institute delivers tailor-made and open enrollment courses across the entire energy landscape. Our bottom-up approach collects data points at the lowest level of granularity to create a complete and detailed analysis.

3 ???· Renewable energy is, however, considered to be key to achieving long-term, secure, reliable, and affordable energy. According to Rystad Energy's Global Energy Scenarios 2024 ...

(Rystad, 4.Oct.2024) -- Here is Rystad Energy's gas and LNG market update from analyst, Christoph Halser: "Norway concludes its gas maintenance season with some disruptions, ...

Vaca Muerta smashes crude output record in 3Q; on track to meet 1 million bpd in 2030. Argentina's Vaca Muerta shale play reached a new oil production record of 400,000 barrels per day (bpd) in the third quarter and is on track to hit 1 million bpd by 2030, according to Rystad Energy's latest analysis.

As the shift from oil and gas to renewable sources of energy, tracking the demand for oil and gas under different scenarios is crucial. With our service, understand the energy mix by primary energy by end-user sector and end-user service. Get a picture of when and by what oil and gas will likely be replaced by carriers.

Peak in global primary energy supply by the coming decade. A transition from fossil fuel to renewables means a revolution in energy efficiency. Primary energy supply is likely to peak soon around 630 EJ and then decline. Combusting molecules to make electricity or motion only converts 30 to 50 percent of the chemical energy to useful energy.

Energy research firm Rystad Energy has predicted that the UK battery energy storage market will grow to 24GW by the end of the decade and account for almost 9% of all global capacity installations. Utility-scale battery systems could also present an opportunity for investment in the battery storage space with Rystad having said it could ...

Rystad Energy forecasts 73% of the continent's electricity will come from clean sources by 2035, with imports from North Africa potentially delivering up to 24 gigawatts (GW) through subsea interconnectors, supplying ...

According to figures from the trade body SolarPower Europe, the continent installed 41.4GW of solar PV in 2022, representing a 47% increase on the previous year. Rystad's data shows that roughly ...

During a period of extreme volatility and turmoil in energy markets, the Floating LNG sector is experiencing a revival of sorts. Together with Rystad Energy, this report looks at the recent progress in FLNG and FSRU projects, highlighting their advantages and their role in rapidly delivering LNG to an LNG-deficit world.. Download the report to learn more.

E& P Analyst & Product Manager, Rystad Energy | Fuelling conversations on E& P trends, decarbonisation strategy, M& As, and upstream fiscals · At Rystad Energy, the team and I empower stakeholders with in-depth analyses and strategic insights into the exploration and production landscape of Asia Pacific. Our collaborative efforts enhance industry ...

The energy transition is gaining momentum, and the industry is accelerating toward a widespread, fundamental global evolution. Rystad Energy is proud to release its flagship annual report - Global Energy Scenarios 2024 - which concludes that the goal of limiting global warming to 1.6 degrees Celsius above pre-industrial levels is a monumental task, but still achievable.
