

# Do I need to declare solar power for personal use

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Do solar panels need direct sunlight?

No. Solar panels don't need direct sunlight to harness energy from sun, they just require some level of daylight in order to generate electricity. That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Do I need planning permission for a solar PV project?

The rules apply to both solar thermal panels and solar PV. However, permitted development rights do not always apply as there are a few exemptions. If your project falls into one of these, you will require planning permission unless you can make any adjustments to your plans. Exceptions can include:

Can you put solar panels on a building?

Yes, if the installation falls under permitted development. However, if you live in a conservation area or world heritage site you can't put solar panels on the principal or side elevation walls of your house if it fronts a highway. This would require a planning application. Are there restrictions for solar panels on a listed building?
