

Do photovoltaic panels need 3C certification

Do you need an MCS certification for solar panels?

There are MCS certifications available for solar panels and installers, which when combined should mean your installation goes smoothly. You should also look for products and specialists with a Flexi-Orb certification, which will ensure the same high standards. Why is the MCS certificate important?

Do solar panels need a Microgeneration Certification Scheme (MCS) certificate?

Although it's not strictly required for your solar panels to have a Microgeneration Certification Scheme (MCS) certificate, it's highly recommended. Government data shows the MCS has certified over a million installations since its launch in 2007 and has around 2,000 registered installers.

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

Are solar panels MCs accredited?

Unlike the Gas Safe Register, solar panel installers and suppliers are not required by law to be MCS accredited. Instead, the scheme rewards suppliers, installers, and products with a certificate if they meet a certain standard - reassuring customers that the product and service they're investing in will be of a good quality.

Why do I need a solar panel certificate?

This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point. Your installer should send you the certificate after they've commissioned your solar panel system. Can neighbours object to solar panels?

What if a solar product or installer isn't MCs accredited?

If a solar product or installer isn't MCS accredited, it's worth being a bit cautious. Although it's not a legal requirement for installers to be MCS accredited, consumers need to have a certificate for their solar panels if they are applying for financial funding through an incentive scheme, such as the Smart Export Guarantee (SEG).
