So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

We manufacture control systems for all energy related sectors. Our key services are in the fields of power plant and network control technology. EN-CO produces complete, turnkey ready electromechanical equipment for power plants, particularly small hydroelectric power plants. The renovation of existing power plants and their technical ...
