I am doing price comparisons. I see that in the United States Victron has a 48 V battery, but it is very small. So I am most likely going to DIY route. Probably with a JKBMS. My question is: what is the benefit or advantage of attaching a Victron battery to a turbo GX or Quattro inverter, instead of a non-Victron battery?

You may be considering whether you need a solar charger or an external battery. For short trips, such as overnight camping, an external battery pack should be sufficient. A small external battery can be charged from a wall socket or using a USB plug and can power small devices like your cell phone for a day or two.

The 1.21 W integrated solar panel would take approximately 30.5 hours of full sun, but it does help keep it topped up in between charges. It can be recharged by plugging it into any USB outlet or by connecting it to an external solar panel. It claims to charge a standard smartphone between 2-3 times. E.
