

Fiji wave solar

Who is island solar Fiji?

Island Solar Fiji is your trusted installer of quality solar systems and battery storage. We work with you to improve your power reliability and save the planet.

Can solar energy save Fiji?

Fiji is an agricultural based country that produces a variety of vegetables and fruits which could be preserved. Solar thermal energy could play an important role to achieve this goal.

Where are Fiji's New solar power projects located?

Three new solar power projects are initiated. These are located at Qeleloa, Viti Levu and Taveuni. The Qeleloa 5 MW PV-grid connected system is being developed by a local private solar firm under the purchase agreement with the Government of Fiji.

What is Fiji's offshore wave energy?

It is highlighted that offshore wave energy for Fiji is similar to that of the south of the Tonga group and slightly lower than the Southern Cook Islands. Viti Levu and Vanua Levu are capable of generating wind power of 9 kW /m.

Why do organisations in Fiji switch to solar energy?

The answer is simple. Reduce costs, maintain control and look after Fiji. Organisations in Fiji choose to go solar for their energy for a variety of reasons, including financial, environmental, and strategic benefits. One of the primary reasons organisations in Fiji switch to solar energy is to save money on their energy bills.

How is energy provided in Fiji?

The provision of energy in Fiji is provided through electrical power grids consisting of microgrids installed in Government facilities and community-run in rural areas. Furthermore, diesel generators and solar home systems also are utilized as a way of power providers.

Solar Fiji is a leading provider of renewable energy solutions, specializing in solar power systems for residential, commercial, and industrial clients. With decades of experience in the industry, our team of experienced managers, skilled engineers and technicians are committed to providing innovative and cost-effective solutions tailored to meet the unique needs of each client.

All solar panels are ideal for remote and isolated locations, saving the cost of running power mains wires. SPE's panels combined with our specially designed intelligent battery chargers will have enough power to operate efficiently even during limited sunshine.
