

Are French startups tackling the energy crisis?

As the world faces an accelerated energy crisis sparked by the war in Ukraine, French startups were already busy developing disruptive technologies to expand access to stabilized power from renewable sources.

What does the IEA report say about France's post-2030 electricity mix?

The IEA report calls on the government to take a timely decision on a vision for France's post-2030 electricity mix and on the related financing mechanisms in order to send clear signals to investors, especially on nuclear energy.

What will France's energy system look like in 30 years?

France's energy system is about to undergo an unprecedented revolution. In fewer than 30 years, everything must change: no more oil and gas imports; a lot more solar panels, wind turbines and bio-energies. Gone will be the gas stations and oil-fired boilers, replaced by electric vehicles, bicycle paths, and heat pumps.

What is France doing to reduce fossil fuel dependence?

The bill was presented by the Government on September 26, 2022. In a bid to lower fossil fuel dependence, France is pursuing a dual track strategy by pushing renewable and nuclear energy (the latter representing 69% of the French energy mix).

Does France need a new energy policy?

France has helped guide international efforts to tackle climate change, but it needs to accelerate key parts of its energy transformation to meet its targets. The government is facing crucial decisions about its future energy mix, according to a new policy review by the International Energy Agency.

What does the IEA review say about France's energy policy?

The IEA review confirms the orientations France has adopted, based on three pillars: strengthening energy efficiency, developing renewable energies and maintaining a nuclear electricity base."
