What is France's energy sector?

France's energy sector is dominated by fossil fuels and nuclear energy; the latter of which France is the most strenuous supporter and largest producer in Europe.

Does France have a low-carbon energy mix?

France has a low-carbon electricity mix owing to its nuclear fleet, yet many reactors are reaching the end of their lifetime. The country has started an ambitious energy transition by designing a national low-carbon strategy, carbon budgets, a carbon

What will France's energy system look like in 30 years?

France's energy system is about to undergo an unprecedented revolution. In fewer than 30 years, everything must change: no more oil and gas imports; a lot more solar panels, wind turbines and bio-energies. Gone will be the gas stations and oil-fired boilers, replaced by electric vehicles, bicycle paths, and heat pumps.

How does France benefit from decarbonised electricity?

France benefits from decarbonised electricity and the lowest per capita emissions of advanced economies thanks to the role of nuclear energy, which accounted for 71% of its power mix in 2019, and the role of hydro power (10%).
