

Gemini energy St Kitts and Nevis

Does St Kitts and Nevis have a national energy policy?

Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

How much does electricity cost in St Kitts & Nevis?

The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

How much energy is lost in St Kitts & Nevis?

Reports indicate that in St. Kitts and Nevis, higher losses are largely attributable to nontechnical losses such as unmetered consumption, leading to losses that are higher than the U.S. Energy Information Administration's average transmission and distribution loss of 6%. By comparison, the U.S. Energy Information Administration reports an average transmission and distribution loss of 6%.

How much solar energy does St Kitts use?

In St. Kitts and Nevis, the solar resource averages 5 kWh per square meter. Solar energy is already being used for grid-powered induction lighting and street lights along roadways. A 7 MW waste-to-energy power plant is planned to come online on St. Kitts in 2015.

Does St Kitts & Nevis rely on fossil fuels?

St. Kitts and Nevis is heavily reliant on fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. The government subsidizes the fuel charge for residential customers, partially shielding that sector from price volatility.

How many MW of wind & geothermal will St Kitts have?

Short-term development plans include 5.4 MW of wind on St. Kitts and 10 MW of geothermal on Nevis. Additional 20 MW of wind, 5 MW of solar, and 35 MW of geothermal is planned.

According to Mr. Williams, the farm is expected to provide between 30-35 percent of St. Kitts and Nevis' baseload energy for the next 20-25 years, while reducing carbon dioxide emissions by more than 700,000 metric ...

Over the past several years, St. Kitts and Nevis has implemented several energy efficiency and renewable energy projects. In 2014, a light bulb exchange program was launched to replace existing residential lighting with 323,000 LED bulbs at a cost of roughly \$2.5 million; the manufacturing sector underwent a comprehensive energy audit; and ...
