

How do I choose a steam generator iron?

Knowing what features are available will help make shopping for a steam generator iron easier. Here are the main ones to consider. Continuous steam pressure: Measured in grams, anything over 50g per minute would be considered a high steam output on a standard steam iron.

Can you put a steam generator on a regular iron board?

When you try to place your steam generator on your regular steam iron board, it may not be suitable as it does not have the proper side tray for your steam generator's base. What type of water can I use in my Philips steam generator iron? The Philips steam generator has been designed to be used with tap water.

Are steam generator Irons worth buying?

In fact, the best steam generator irons can produce up to three times more steam than their smaller counterparts. So, the GHI has rigorously tested the best the market has to offer, to find the ones worth buying. What steam generator iron should I buy?

Can a Philips steam generator iron stay on an ironing board?

As your Philips Steam Iron is equipped with OptimalTemp technology, then it is ok for it to stay on the board all the time. It will not damage the ironing board cover. Can I fill the tank of my Philips Steam Generator during use? How can I fit my Philips Steam Generator Iron on my ironing board?

What are the different types of steam generator Irons?

There are two types of steam generator iron: non-pressurised and pressurised. Non-pressurised models work in a similar way to regular steam irons, but their steam output is much higher. Pressurised models are ideal for the most stubborn of creases, as they have boilers that force steam out more powerfully and can penetrate fabric more deeply.
