

Generators for home backup power Yemen

Does a Generac home backup generator provide peace of mind?

Laurann M. of Los Angeles, California shares how her Generac home backup generator provides her family with peace of mind. Carlos M. shares his story on how his Generac home backup generator kept his family warm and safe during an unexpected ice storm.

Can a backup generator be used as a primary power source?

The backup generator is designed as a backup to utility power only and should not be used as a primary power source. Answer a few questions so we can connect you with local dealers who will provide custom quotes. Equipping your home with permanent backup power requires a solution as unique as your home and the way you live in it.

Which generator should I buy?

Our top pick is the DuroMax Electric-Start Generator, which provides a high power level and has five built-in outlets, making it powerful enough to power appliances like your refrigerator or washer/dryer. You can also read our comprehensive generator buying guide to learn more about the most important factors for buying a generator.

Can a solar generator be used as a backup power source?

Solar generators work well as a home backup power source. Your solar panels keep the generator powered, so there's no need to purchase fuel. You can store them inside, and they're often relatively compact. And they're better for the environment than a gas generator.

Did Generac home backup generator keep family warm during an ice storm?

Carlos M. shares his story on how his Generac home backup generator kept his family warm and safe during an unexpected ice storm. Prepare your home for power outages with the best home standby generator from Generac, the market leader.

Why do you need a backup generator?

When the power goes out, having a backup generator ready to go solves a lot of problems. It keeps your fridge cold, so food doesn't spoil. It ensures that essential medical equipment continues to function, preventing an emergency. And, of course, it keeps the light on.

Many standby generator options in the \$2,000 to \$7,000 range can power a standard American home. But the average generator cost, including installation, is \$9,000. By comparison, a 10 kilowatt-hour (kWh) home backup battery costs about \$8,000 after incentives. If you want whole-home power, you'll probably need more storage than that, though.

Generators for home backup power Yemen

For thunderstorms, hurricanes, and other emergencies, a generator provides a home backup for power outages. However, purchasing a portable generator comes with a big price tag. High-end portable generators can cost between \$800-\$1,500, while smaller models can still set you back several hundred.
