How does Trina Solar work?

Trina Solar uses multiple busbars on a single panel, further improving performance. PERC: Passivated Emitter and Rear Contact (PERC) solar cells include a back surface layer that reflects light back through the cell, reduces heat absorption, and reduces electron recombination, all of which improve panel efficiency.

How much power does a Trina Solar panel have?

It can reach a power of 450W and has an efficiency of 22.5%, which is as good as some of the top solar panels out there. To get this much power from a smaller panel, Trina used their newest tech, called N-Type TOPCon cell technology (or PACO for short), along with high-density cells and multiple busbars.

Is Trina Solar a good company?

Over the last few decades, Trina's strong focus on research and development has led to some great achievements, including 18 solar PV world records in cell and panel efficiency. Trina Solar is ranked one of the top Tier 1 solar panel manufacturers by Bloomberg New Energy Finance.

What bifacial cell technology does Trina Solar use?

Trina Solar has been at the forefront of bifacial cell technology and the new DuoMax Twin panels use a combination of PERC, half-cut, MBB, bifacial cells housed in a dual-glass panel. Bifacial panels perform best mounted on single-axis tracking systems mounted over light coloured surfaces such as sand or even snow.

Is Trina Solar better than SunPower?

Overall, Trina Solar offers above-average solar panels at a below-average price. While they may not be as efficient as SunPower, they're not too far behind. Looking at the table above, Trina Solar's Vertex S+ panel is 1.2% less efficient but about 20% cheaper per watt than its SunPower counterpart.

Who is Trina Solar?

Founded in 1997, Trina is a fully vertically integrated company and one of the oldest Chinese solar panel manufacturers. Over the last few decades, Trina's strong focus on research and development has led to some great achievements, including 18 solar PV world records in cell and panel efficiency.
