The target of the Hungarian Renewable Action Plan is to have 14.65% (2568 MW) of the electricity demand supplied by renewable energy sources by 2020. Even though Hungary has the necessary policies regarding the adaptation of renewable energy resources as required by the EU, some aspects still have discrepancies that deter potential investors.

EcoSolifer is ending the quest for better solar cell efficiency with a powerful combination of two PV technologies--crystalline silicon and amorphous silicon thin film--referred to as heterojunction technology. Today, as a pioneer in ...
