

Are IDM heat pumps sustainable?

iDM HEAT PUMPS provide sustainable heat that makes you independent! Heat pump systems from 2 - 1500 kW You are looking for - We have the solution! From a small family house to a hotel complex, we offer the perfect solution for your building. Single-family house Multi-family house Large object Which heat pump

Is IDM energy a good company?

A steady growth indicates that the management of the employees is the right one. After more than 45 years, the iDM energy family is proud of the company and their employees, who were and are the pillars of success. If playback doesn't begin shortly, try restarting your device.

What makes IDM a leader in Intelligent Energy Management?

Our long-established family business is one of the technology leaders for intelligent energy management in our company, primarily due to its development expertise and numerous technical innovations. One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987.

Where is IDM based?

From the company's headquarters in Matrei in East Tyrol, customers all over Europe are supplied with high quality and reliability. Installers receive comprehensive planning support for the realization of new projects, and can also regularly acquire up-to-date know-how at events and seminars of the iDM Academy.

When did IDM start?

One of the milestones in iDM developments was the introduction of fresh water technology for hygienic water heating in 1987. Since the end of the 1990s, the focus has been on the development and production of economical and environmentally friendly heat pump systems, hot water preparation and also for cooling buildings.

Is battery energy storage systems a new wave in Vietnam?

A New Wave in Vietnam's Energy Sector: Battery Energy Storage Systems (BESS)! Vietnam is at the forefront of a transformative shift towards renewable energy, with Battery Energy Storage Systems (BESS) emerging as a cornerstone technology in ensuring grid stability.

The country's 20.1-gigawatt of total supply from solar and wind power projects is relatively large, but utilizing these sources is difficult due to limitations in electricity transmission and ...
