

Inman solar Cambodia

Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges - such as yearly variability due to droughts and floods.

Who is Inman solar?

Inman Solar is both an Owner/Operator of solar farms as well as a trusted partner to many investors. Because of our EPC experience, and financing capabilities, we often can create value for investors above and beyond what a developer can alone. Let's start a conversation and see how we can work together.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Why are Cambodians investing in solar energy?

Cambodian households and businesses are also increasingly investing in behind-the-meter (BTM) solar energy systems as they're much easier and faster to deploy and costs are lower than utility grid rates, market analysts highlight. Photovoltaic electricity potential in Cambodia. 2017 The World Bank, Solar resource data: Solargis.

Will solar power be a key part of Cambodia's Power Development Plan?

The country recently approved the Power Development Masterplan (2021-2040), covering an inspiring goal of increasing solar PV capacity to 1,000 MW by 2030 and 3,000 MW by 2040. Solar generation will need to be a key part of Cambodia's efforts to expand access to affordable power while also transitioning to cleaner energy.

Why is solar development important in Cambodia?

Solar development will increase investment in modernising the existing energy infrastructure. Plus, off-grid solar and micro-grids will help electrify rural regions that often face the largest energy access issues. Finally, Cambodia's energy prices are some of the highest in the ASEAN.
