A 12V battery box is a compact powerhouse designed to convert your basic 12V battery into a full blown portable power station. Engineered to accommodate 12V batteries, these robust boxes provide secure and portable housing for your power source, and are equipped with multiple charging ports and sockets so you can plug your appliances and gadgets in directly.

Lithium Battery Box, does the battery need to breathe . I turned a small ice chest into a battery box, and used a 12V holding tank heater pad to make sure the battery is safe in cold weather. My question is, since it is Lithium, does it need to breathe? Do I need to drill a few holes in the ice chest so that there is some airflow?
