

What is Yingfa solar project?

The project is a major key project in the new energy sector of Yingfa Group, with a total investment of 11 billion yuan. It will be constructed in two phases. The first and second phases will each be 10GW. After the project is completed, it will achieve an annual production capacity of 20GW of high-efficiency photovoltaic solar cells.

Why is Yingfa group launching a solar cell production line in Yibin?

In addition, as a professional manufacturer of solar cells in the industry, Yingfa Group has deployed the cell production line in Yibin, Sichuan, which will not only play an important role in the development of Yibin's industrial economy, but also further accelerate the construction of Yibin and Sichuan photovoltaic industry clusters. Editor/Ma Xue

Is Yingfa group setting up a PV plant in Yibin?

According to reporting by Chinese news outlets, Yingfa Group and the municipal government of Yibin has entered into an agreement that will lead to the setup of a PV cell production base in the city's High-Tech Industrial Park. The signing ceremony was held on March 31. Yibin is a prefecture-level city in China's Sichuan Province.

Who is Yingfa group?

Yingfa Group specializes in the research and development, production and sales of high-efficiency crystalline silicon solar cells. Yingfa Group specializes in the research and development, production and sales of high-efficiency crystalline silicon solar cells.

What is Yingfa Deyao's crystalline silicon solar project?

On June 18, 2022, the first phase of Yingfa Deyao's 20GW high-efficiency crystalline silicon solar cell production project started construction in Gaojie Park, Xuzhou District, Yibin City, Sichuan Province. The project is a major key project in the new energy sector of Yingfa Group, with a total investment of 11 billion yuan.

How much will Yingfa invest?

Yingfa plans to invest a total of RMB 11 billion into the base. The first phase will entail RMB 5.5 billion. Based in China's Anhui Province, Yingfa is a supplier of high-efficiency PV cells. The information from the company's own website reveals that Yingfa's current annual production capacity is around 2GW.

It also said that the sale to Yingfa Group of two cell production lines, including equipment and facilities, has been put on hold. "We are moving in a complex environment," a Longi spokesperson told pv magazine. ...
