The scheme was launched by Prime Minister Narendra Modi on February 15, 2024. Under the scheme, households will be provided with a subsidy to install solar panels on their roofs. The subsidy will cover up to 40% of the cost of the solar panels. The scheme is expected to benefit 1 crore households across India.

However, in Lesotho measured solar radiation datasets are not sufficient both temporally and spatially as there are only seven solar radiation measuring sites, two of which are not reliably operational. This study solves the problem of the scarcity of solar radiation data in Lesotho, by developing a solar radiation database for the country.

A mokorotlo, the same colour as the characters on the plate, is stuck onto the plate to show a 5-year validity period. Dealer plates are also red-on-white but do not follow the A 1234 standard and do not show the mokorotlo. Before 1979, private plates were white-on-black and had an additional preceding "L" which stood for Lesotho.

Solar Energy in Lesotho is a renewable energy source that has been gaining traction in recent years. It is a clean and sustainable form of energy that has the potential to provide power to the entire country. Lesotho is located in the southern hemisphere and is blessed with an abundance of sunshine, making it an ideal location for solar energy.

Corporate Social Responsibility Frazer Solar incorporates CSR activities across all aspects of its operations and Lesotho was no exception. First and foremost was the inclusion in the project of an initiative to eliminate the use of dirty, dangerous, dim and expensive paraffin and candles as the main source of lighting for the entire country, some 350,000 homes.
