TrendForce notes that the lithium battery market experienced a peak season from March to May. In July, market demand is expected to remain weak, with lithium prices falling to the sensitive range of CNY 80,000-90,000 per ton. Both EV and ESS cell prices are expected to face downward pressure at the beginning of the third quarter.

That has been driven by the fall in lithium-ion battery cell prices which itself was driven, in large but thought not entirely, by falls in raw material prices (primarily lithium carbonate). We ask Li what the implications of this fall in BESS price are for a company like Sungrow, as well as the importance of pricing in the energy storage ...
