

Can the Gambia transform the energy sector?

An unprecedented level of support from the international community provides The Gambia with the opportunity to transform the energy sector and emerge as one of the leading energy sectors in the sub-region and the African continent. In this context, the Electricity Roadmap has undergone its third update since 2015.

Should the Gambia import electricity from Senegal or Cote d'Ivoire?

The most important conclusion from the generation planning is that the least cost option for The Gambia is to import electricity from Senegal and/or Cote d'Ivoire. This conclusion is robust in all scenarios considered.

Does the Gambia have solar energy resources?

The Gambia has significant solar energy resources which can be deployed via solar PV plants, which have become price competitive with thermal plants and attractive for advancing national renewable energy and greenhouse gas (GHG) reduction targets. IRENA (2018) has estimated national solar potential at 428 MW.

What are the different types of energy transformation in Gambia?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Gambia for 2021. Another important form of transformation is the generation of electricity.

Did Gambia import energy?

Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used. For example, crude oil is refined into many different kinds of fuels and products, while coal, oil and natural gas can be burned to generate electricity and heat.

Does the Gambia need more power generation capacity?

The Gambia's power sector will soon need additional generation capacity to be able to cover the forecast demand. A gap between available capacity and peak demand is identified from 2022 with the expiration of the Karpower contract and by 2025 nearly 140 MW of new capacity will be needed.

By embracing clean energy, The Gambia can improve its citizens' quality of life, create new economic opportunities, and combat climate change. Empowering minds, the third transition holds the key to unlocking human potential and breaking the cycle of poverty. Yet, with a 57% funding gap in education, The Gambia faces tough choices in how it ...

Phase 1 will provide energy to 1.1 million people in The Gambia, Guinea-Bissau, and Mali. OMVG Energy Project. The Gambia, Guinea, Guinea-Bissau, and Senegal are all involved in The Gambia River Basin Development ...

# Lowell energy The Gambia

Victor Vargas, Lowell's Energy Advocate, offers personalized assistance to residents and small businesses seeking solutions for their utility bills. You can find Victor at the Department of Planning and Development office located at 50 Arcand Drive, ...

Many Gambians were hopeful when the government launched the energy sector strategy called The Gambia Electricity Sector Roadmap 2019-2025, which was prepared with World Bank support. This strategy set several important long-term and medium goals. Among the medium goals to be achieved by 2025, include improving electricity generation capacity ...
