Can I DIY my solar panel installation?

If you've researched solar energy solutions, you probably know that it's possible to DIY your solar panel installation, often referred to as DIY solar. But as it turns out, DIY solar can mean something more than just installing your own solar panels -- it can mean building your solar panels from scratch.

Is DIY solar a good idea?

But as it turns out, DIY solar can mean something more than just installing your own solar panels -- it can mean building your solar panels from scratch. While not too common, if you have a knack for major DIY assembly projects, you may want to make your own solar panel components yourself.

How do you make a solar panel?

Choose and cut your board in such a way that you have longer and fewer rows (e.g., four rows, each with 12 cells). You'll use tabbing wire to connect the solar cells in each of your rows together. Solar cells have several tiny lines running lengthwise and two thicker lines (contact pads) running across their width.

How much does a DIY solar system cost?

If you're just dipping a toe into solar via the DIY route, start with one off-grid panel in a DIY solar kit that includes all the necessary cables, accessories and instructions, such as Renogy's 200W 12V General Off-Grid Solar Kit (currently just \$230).

Can you make a solar panel out of broken solar cells?

If you want to save money, consider making a solar panel out of broken solar cell pieces. These can easily be reused and cost only a few dollars for a whole bag. You'll also need a multimeter, hot glue gun, conductive copper mesh, and a conductive pen to complete this DIY project. Link the cells together, and you're good to go.
