A wall mount enclosure is a moderately durable and secure structure designed to house and safeguard critical components. One of the primary benefits of wall-mounted enclosures is that they allow you to save space if you don't have enough room for floor-standing enclosures, or if transferring a cabinet to a wall mount is perceived as providing more security and privacy.

The material characteristics of aluminum make it an ideal material for the protection of critical electrical equipment in harsh environments. Excellent corrosion resistance prolonging the life of the enclosure
