Will Mexico's solar energy project go faster?

"It has to go faster." In April, Mexico plans to power up the first phase of a huge solar energy project near a beach town popular with tourists making the short drive from the United States. Once completed, the full \$1.6 billion project will have a generating capacity of 1,000 megawatts -- enough to power some 500,000 homes.

Does Mexico have solar power?

Solar power in Mexico has the potential to produce vast amounts of energy. 70% of the country has an insolation of greater than 4.5 kWh/m<sup>2</sup>/day. Using 15% efficient photovoltaics, a square 25 km (16 mi) on each side in the state of Chihuahua or the Sonoran Desert (0.01% of Mexico) could supply all of Mexico's electricity.

How many solar panels are installed in Sonora Mexico?

French utility Engie has powered a 100MW solar PV plant in the northwest state of Sonora, Mexico. More than 390,000 solar panels have been installed in the PV plant, which represented an investment of over US\$112 million. French utility Engie has powered the Solar Akin 100MW solar PV plant in the northwest state of Sonora, Mexico.

Is solar PV a viable energy source in Mexico?

Solar PV was successful in both, securing 1,691 MW of the 2,085 MW auctioned in the first and 1573 MW of 3473 MW in the second auction. In 2013, 22% of the installed electricity generation capacity in Mexico was from renewable sources. The majority, 18.1% coming from hydroelectricity, 2.5% from wind power and 0.1% from solar PV.

What are the applications of solar energy in Mexico?

Historically, the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating, water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost.

What is Mexico's largest solar project?

It will be the largest solar project built by Mexico's state-owned electric company. In Puerto Peñasco, near the top of the Gulf of California and border with Arizona, rows of solar panels that tilt with the passing sun run off to the horizon hovering above the sand.

Análisis del mercado de energía solar en México Se espera que el mercado mexicano de energía solar registre una CAGR de más del 8% durante el periodo previsto de 2020-2025. México tiene algunos de los perfiles de irradiación solar más atractivos del mundo.
