

# My solar panel Germany

Why is solar power growing in Germany?

In 2004, Germany was the first country, together with Japan, to reach 1 GW of cumulative installed PV capacity. Since 2004 solar power in Germany has been growing considerably due to the country's feed-in tariffs for renewable energy, which were introduced by the German Renewable Energy Sources Act, and declining PV costs.

How many solar panels have been installed in Germany in 2024?

This new wave of solar producers aren't just getting cheap electricity, they're also participating in the energy transition. More than 500,000 plug-in solar systems have been installed in Germany, most of them taking up a seamless spot on people's balconies. New data shows another 220,000 PV devices were installed in the first half of 2024.

Are solar panels a good investment in Germany?

In the early 2000s, Germany encouraged people to install solar panels on the roofs of their homes by rewarding them with payments, known as feed-in tariffs, for sending energy to the grid. But those have become less lucrative in recent years, making such large-scale investments less attractive.

Can I install a solar system in Berlin?

The SolarPLUS program is a great way to make solar energy more affordable and accessible. If you are considering installing a solar system in Berlin, we encourage you to check out the SolarPLUS program (pdf, only in German). Solar subsidies in Germany can be a great way to offset the cost of installing solar panels.

How much do solar panels cost in Germany?

In Germany, individual plug-in panels sell for as low as 200 euros, or about \$217, at big box stores. Patrick Junker for The New York Times More than 500,000 of the systems have already been set up across Germany, and new laws that relaxed rules around solar panel installation have contributed to a boom in use.

Can solar panels be installed on balconies in Germany?

People across Germany are installing lightweight solar panels, without the need for an electrician or heavy tools. Photographs and Video by Patrick Junker Melissa Eddy visited the Solago warehouse in Hilden, Germany, and has been counting solar panels on balconies across the country for months.

As of Jul 2024, the average cost of solar panels in Berlin is \$2.25 per watt making a typical 6000 watt (6 kW) solar system \$13,477 before the federal solar credit and \$9,434 after claiming the federal solar tax credit.
