

Muscat - Oman is ranked third in the Middle East and North Africa in renewable energy transition, 15th among emerging economies, and 38th globally, according to the 2021 Climatescope assessment report published by Bloomberg. Climatescope is a market assessment and an index that evaluates the conditions for energy transition investment globally and the ...

As the sultanate looks to manage its energy transition and inject capital into its fiscal balance, privatisation, sector reorganisation and renewable energy are key topics on the agenda for Oman's utilities sector. Reducing reliance on natural gas is a top priority, with a number of large-scale projects using solar energy helping the country achieve

By the end of 2024, TotalEnergies' gross renewable electricity generation installed capacity had reached over 24 gigawatts (GW). With further growth, the company plans to produce 35 GW of power ...

Lagos, 23 February 2023 - The Universal Energy Facility (UEF) - a results-based financing facility managed by Sustainable Energy for All - has announced that it will provide grants to renewable energy companies who applied to have their projects financed as part of the facility's Stand-alone Solar for Productive Use programme in Nigeria.

In line with the hydrogen energy goals, Al Hashimi mentioned that site tours would be conducted at locations designated by Royal Decree No. 10/2023 for renewable energy and clean hydrogen projects. These sites are being offered based on the ministry's strategic plans and the initiatives of Hydrogen Oman Company (Hydrom). -- ONA

At its core, an I-REC is an Energy Attribute Certificate (EAC), designed to track and verify renewable energy consumption. Many companies may want to shift toward renewable energy but face a unique challenge: most electricity grids are powered by a mixture of energy sources -- both renewable and non-renewable.

Oman aims to become a major player in the green hydrogen market, targeting an annual production of 1 million-1.25 million tonnes by 2030. With abundant low-cost solar and wind energy, ample renewable energy generation areas, robust port infrastructure, and a strategic geographic location, Oman has launched an auction for integrated green hydrogen projects in ...
