

What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa), the rest of the generation capacity is in private hands.

What are El Salvador's green energy ambitions?

El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. - El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

How much electricity does El Salvador produce a year?

Gross electricity generation in 2006 was 5,195 GWh, of which 40% came from traditional thermal sources, 38% from hydroelectricity, 20% from geothermal sources, and 2% from biomass. In 2006, total electricity sold in El Salvador was 4,794 GWh, which corresponds to 702kWh annual per capita consumption.

Is El Salvador a geothermal country?

El Salvador is also one of the countries included in the SIEPAC project, which will integrate the electricity network of the country with the rest of the Central American region. El Salvador is the country with the highest geothermal energy production in Central America.

How many generation companies are there in El Salvador?

In 2006, there were 11 generation companies in El Salvador, with 18 out of 22 generation plants in private hands and 97% of hydroelectric capacity owned by the public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa).

What are the upcoming projects in El Salvador?

The upcoming projects in El Salvador include the construction of a Biogas Power Generation Plant on the Acelhuate River in San Salvador, the commissioning of a photovoltaic plant at the 15 de Septiembre Hydroelectric Plant, and the establishment of a wind park in Metap#225;n, Santa Ana.

ETESAL, which is the official transmission owner in El Salvador and thus federal, owns and maintains the transmission system; the UT, a private corporation, operates the system and national electricity market; SIGET, a Salvadoran superintendent, regulates the power sector; the National Energy Council (CNE) creates the national policy; and then ...

AES invested US\$ 300,000 in the construction of the SmartGrid, which is in the San Salvador metropolitan area. AES El Salvador highlighted that during the next few years, through its facilities, it will allocate US\$ 3.3
