Ya est s conectado a la red, pero por alguna raz n sufres apagones con la suficiente frecuencia como para obligarte a invertir en un sistema off-grid. El punto de conexi n a la red m s cercano a tu casa est  lejos y la red el ctrica quiere cobrarte una cantidad excesiva de dinero por conectarte a ella. Sistema solar h brido.

En lo que respecta a la energ a solar, los sistemas on-grid son los que se encuentran conectados a la red el ctrica y son respaldados por ella ante la falta de generaci n solar (adem s, de manera inversa, pueden entregar energ a a la red). Por su parte, los sistemas off-grid son aut nomos ya que se encuentran aislados del sistema el ctrico. La elecci n de un ...
