

What is our solar materials portfolio?

Our solar materials portfolio features a range of raw materials, electronic components and finished products for the solar and energy storage sectors. Supported by allocation agreements with several major PV manufacturers, we're well positioned to manage long-term material supply programs for our customers.

What is solar materials?

We have taken this as an opportunity to develop a technologically and economically leading recycling process. SOLAR MATERIALS is a cleantech startup from Magdeburg, which recycles solar panels. For this purpose, we have developed a new recycling technology that allows for the first time to economically recover all raw materials from solar panels.

What material is used for solar cell production?

It is the primary feedstock material used for the production of solar cells today. Polysilicon feedstock generally consists of large rods which are broken into chunks or chips of various size, then cast into multicrystalline ingots. The ingot materials are subsequently sliced into silicon wafers suitable for solar cell production.

What is raw polycrystalline silicon for PV Manufacturing?

Raw polycrystalline silicon for PV manufacturing. Offered in various grades and formats including chunks, chips, powder and ingot. Junction boxes offering exceptional heat dissipating performance and manufacturing flexibility for solar panel producers.

Who is insulating and protection for photovoltaic modules?

Insulation and protection for photovoltaic modules over several decades. We are a pioneer in the dynamic photovoltaic market and a leading manufacturer of backsheet laminates for solar modules.

Are Targray solar panels good for building integrated photovoltaics (BIPV) systems?

Targray has unveiled a line of high-efficiency solar modules for building integrated photovoltaics (BIPV) systems. Featuring a range of solar tiles, shingles and wall panels that integrate seamlessly with any building.

PP hollow sheet (Polypropylene Hollow Sheet) is a raw material blended with polyethylene, extruded through the hollow board production line, the cross-section of the board is lattice-like, ...

Hollow particle board, also known as lightweight particle board or hollow core particle board, is a versatile material that offers numerous advantages in various projects. Whether you're a furniture manufacturer, interior designer, or ...

Jwell Machinery's hollow PVC door board extrusion line adopts professional foam extrusion technology and

Photovoltaic hollow board raw material sales manufacturer

our special designed SJZ92/188 conical twin screw extruder for better plasticization, stable production, easy operation and long ...

Our solar materials portfolio features a range of raw materials, electronic components and finished products for the solar and energy storage sectors. Supported by allocation agreements with several major PV manufacturers, ...

Uncover where do the raw materials for solar panels come from as I guide you on an enlightening exploration into this renewable energy source. ... driving the shift of solar panel production overseas. Despite this trend, the ...

Anti-static hollow board box, plastic hollow board box is a new type of packaging material, made of PP drawn pellets and anti-static material, non-toxic, odorless, moisture-proof, corrosion ...

Photovoltaic hollow board raw material sales manufacturer
