

Photovoltaic panels for the house

How many homes in the UK have solar panels?

More than 1.39 million homes in the UK have solar panels, as of June 2024, according to government data. Solar panels not only save you money, but they can also earn you cash, all while helping to reduce the planet's carbon footprint. And they'll still generate electricity on gloomy days, which the UK experiences a lot of.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How much does a solar panel cost in the UK?

The average cost of a solar panel system for a typical three-bedroom house in the UK is £9,600, including a battery. Solar panels can save you up to £1,014 annually, totalling nearly £30,000 of savings over their lifespan. Adding a solar battery can boost your energy savings by up to 90 per cent.

How do solar panels work in the UK?

Dependent on sunlight: Solar panels can generate electricity without direct sunlight; however, they are more efficient during peak sun time in the day. Specific solar panel placement: The best roof direction for solar panels in the UK is southwards with a 5° to 7° westward tilt.

How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage -- this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m² of roof space. Don't forget to include at least 30 cm from the roof's edge.

Are residential solar panels worth it?

If you compare this to the average annual electricity consumption of a household, which is around 2,700 kWh according to Ofgem, residential solar panels can cover 117% of your electricity demand in perfect conditions. Other factors that affect whether solar panels are worth it include the following: Performance all year round.
