

# Pricing rules and standards for photovoltaic panel installation

Do solar panels comply with building regulations?

Your solar panel system must comply with building regulations in terms of structural integrity, electrical safety and fire safety. These regulations may vary depending on the size and type of the installation. It's advisable to work with accredited installers who are familiar with these requirements.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

When did solar panels become a building regulation?

In 2005, household electrical work was absorbed into the UK government's official Building Regulations. A year later, the Climate Change and Sustainable Energy Act 2006 brought microgeneration systems like solar panels under the umbrella of the Building Regulations. Should you receive a building regulations certificate for your solar panels?

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

How do I choose a solar PV installer?

It should include an estimate for the annual solar PV generation and an estimate of the level of self-consumption of solar PV at the property. It is sensible to get at least 3 quotes before choosing your installer. Do not select the installer on cost alone as cheaper components may perform worse and have a shorter lifespan.

The average cost of a solar panel in the UK is between £150 and £300 for a 350-watt solar panel. The most popular solar installation is a 3.5 kilowatt-peak (kWp) system. According to the ...

o Solar panel cost, including installation: £7000.00 (Actual price ranges from £5,000 to £9,000)
