

What is Argentina's energy policy?

1. Policy Argentina has a target to reach 8% of renewable electricity generation by 2016, established in 2006 by Law 26190. In order to reach its target, in 2009 Argentina launched an auction through its national energy company (ENARSA).

How renewable energy penetration can be achieved in Argentina?

Renewable energy penetration. In order to reach the 20 % target for 2025, installed renewable generation capacity must increase to 10,000 MW from a current base of only 800 MW in operation in the country. Power demand in Argentina has historically grown by 2-3% p.a. and it is high.

Is the Argentine renewable PPA market a corporate market?

This initial trend started to shift towards a corporate market through Resolution No. 281/2017 of the Argentine Ministry of Energy and Mining (currently, Secretary of Energy), which established a set of rules for the corporate renewable PPA market (MATER).

Can Argentina become a relevant player in the energy transition?

This analysis provides a comprehensive view of how Argentina can leverage its energy capabilities to become a relevant player in the energy transition. Energy has been pivotal to human development, from the steam engine to electricity.

How much energy will Argentina produce in 2030?

Together they will generate almost 5 GW of energy, approximately 12 percent of Argentina's installed capacity, and reduce greenhouse gas emissions by 7 million tons of CO₂ per year. This is about 4 percent of Argentina's NDC commitment for 2030. Reduced air pollution also promises health benefits for the population.

Is Argentina a good exporter of low-emission hydrogen?

Argentina has abundant potential as an exporter of low-emission hydrogen and its derivatives, in particular, thanks to its world-class renewables resources and vast amounts of natural gas. At present, there are many ongoing green hydrogen projects in the early stages of development.
