If your solar system's volts were 12 and your amps were 14, you would need a solar charge controller that had at least 14 amps. However due to environmental factors, you need to factor in an additional 25% bringing the minimum amps that this charger controller must have to 17.5 amps.

Solar Market Outlook in Slovakia The Slovakian Energy Ministry is committed to pushing its renewable energy sector in order to achieve its target in the next 5 years or so. Majority of the solar energy sector is dependent on supply equipment from the US and other global developers of PV systems in order to meet its targets. The current electric generation in Slovakia is lower ...

Our inverters enhance the power output from your solar panels, ensuring you harness the full potential of your solar system. Reduced Electricity Bills Our inverters ensure efficient energy conversion, leading to reduced electricity bills and making them a ...
