Is SolarEdge a good battery?

The SolarEdge Home Battery is a decent-sized 9.7 kilowatt-hour battery that comes with good performance and efficiency specs, as well as an unlimited cycle warranty. It also packs some intricate battery management features, designed to assist you in your battle against time of use rates. We'll talk more about this below.

Does SolarEdge home battery have a warranty?

The SolarEdge Home Battery has one of the best battery warranties we've seen simply because there's no cycle or throughput clause. This means there's no limit on how much you can use your battery during its standard 10-year warranty period. It's rare to see this on the battery market. The other major aspects of the warranty are industry-standard.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

Is SolarEdge a modular battery?

SolarEdge's battery isn't modular, meaning you won't be able to upgrade your storage capacity on a singular battery unit. If you find yourself needing more than 9.7 kWh, you'll have to buy another large battery versus just adding a little extra capacity to your existing battery. Needless to say, this can get expensive.
