

Solar trading Timor-Leste

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Why did Timor - Leste invest in solar photovoltaics?

According to Silva, the government's purpose was to invest in Solar Photovoltaics (PV) because it can help Timor - Leste save the cost of fuel which will be filled with generators in Hera and Betanu. "Every year the Government pays \$126 million for the fuel which will be filled in the generator," he said.

What does a solar technician do in Timor-Leste?

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

What is the photovoltaic units implementation project in Timor-Leste?

Just as the remaining renewable energy sources that are being explored by the Government in Timor-Leste, the photovoltaic units (or solar project) implementation project is specially directed for the families that live in remote areas, where difficulties still exist in the national energy network installation.

Who bids for solar IPP project in Timor-Leste?

For Timor-Leste, bidders are typically from legacy countries such as Indonesia, Portugal and People's Republic of China. For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement.

For Timor-Leste, the project has funding of US\$5.78 million, with three main outputs implemented across the municipalities of Manatuto, Manufahi, and Ainaro: support solar energy access to 1000 rural households not connected to the national electricity grid, as well as improved cooking stoves that will reduce the use of firewood and the hazards ...
