

Stainless steel solar bracket installation diagram

How to install solar stack pedestals?

Solar Stack pedestals can be installed on different types of roofs: Tile, Modified Bitumen, TPO, Concrete etc. Roof must be cleaned with brush. Place, where the Solar Stack pedestals and solar panels are to be placed on the roof must be clean, dry and at.

How do I install a solar stack?

Mark the lines across the roof for all the mounts. Prepare the Solar Stack pedestals and place them next to the marked lines where they will be installed. Surface Preparation. All roof surfaces must be free of any debris, dirt, grease, oil, and standing water before adhesive is applied. Follow adhesive manufacturers application instructions.

What is solar stack?

Solar Stack's innovative design incorporates a patented pedestal used in conjunction with a code-approved adhesive. Solar Stack eliminates potentially disastrous roof penetrations and allows roof warranties (and the roof itself) to remain intact.

Can I install a bracket on a Kingspan roof?

If your installation is on a different roof type, please contact Clenergy to obtain a project-specific engineering certificate to support your installation. Note: Bracket installation is allowed on the full rib of Kingspan roof only. Installation on lap joints must be avoided.

Do I need a primer before installing solar stack pedestals?

Before foam adhesive and Solar Stack pedestals are installed to the roof, "primer" coating must be applied for stronger bond between the TPO roof and foam adhesive. Appropriate "primer" must be determined with the roof manufacturer to avoid warranty issues. Determine the spacing of Solar Stack pedestals for your solar array design.

What are the components of a solar stack pedestal system?

The system is a non-separately derived system. The following components have been evaluated for bonding as the fault current ground path: PV module, Mid Clamp, End Clamp, Pedestal and Ground Lugs. Solar Stack pedestals can be installed on BUR (Build Up Roofing), Mineral surface (Modified Bitumen), EPDM, PVC, TPO, Hypalon and Concrete roofs.
