

ComAp announces the new IntelliNeo 530 BESS controller, an addition to ComAp's IntelliNeo controller family signed to respond to the needs of BESS packagers, it enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, monitoring and protection of the auxiliary ...

Our configuration software tool, IntelliConfig, now has a new version available for download. This version supports all the controllers that ComAp has launched recently - IntelliNeo 530 BESS, IntelliSys 2000 and IntelliNano AMF 5. In addition, the latest IntelliConfig version now includes a new docking system feature, which enables users to customise their working ...

IntelliNeo 6000 is a controller for managing and optimising on-grid and off-grid hybrid microgrid systems. ... Advanced battery state machine to provide precharge condition for BESS to transition from grid-following to grid-forming; Onboard Modbus Client for RTU/TCP communications to inverters and storage systems;

The IntelliNeo 6000 features the power behind our recently released IntelliGen 1000 and will be the standard for renewable energy integration in larger, multi-power source sites. It can control the entire microgrid site in islanded or grid-connected configurations and supports all energy sources, including BESS and up to 64 gen-sets.

IntelliNeo 530 BESS is now available to order. IntelliNeo 530 BESS enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, monitoring and protection of the auxiliary systems, including HVAC, fire detection and suppression, ingress detection, and E-Stop.

IntelliNeo 530 BESS enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, monitoring and protection of the auxiliary systems, ...

IntelliNeo 530 BESS tambi n ofrece una interfaz de comunicaci n segura con el mundo exterior a trav s de Airgate 2.0. Interfaz de f cil usabilidad: IntelliNeo 530 BESS se basa en las plataformas conocidas y utilizadas en todo el mundo de ComAp, similares a IntelliNeo 5500 o IntelliGen 500 G2, ...

For Multiple BESS InteliNeo can only connect to a single BESS for BCB control Exception: Battery Control Unit or master that controls multiple battery packs to provide: > Single node of communication to InteliNeo 5500/6000 > Sync functions between multiple batteries > Manage load sharing/ SOC/ cycling between multiple batteries

InteliNeo 530 BESS is a dedicated controller for Battery Energy Storage Systems that enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS. In addition, InteliNeo 530 BESS can also be used to control, monitor and protect the auxiliary systems of the BESS.

The InteliNeo 530 BESS offers safe and reliable control for the battery energy storage system and all it's key parts, and can help optimise costs, decrease noise pollution and reduce emissions. This robust energy management system enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a ...
