

How much solar power does Austria have?

As of the end of 2022, solar power in Austria amounted to nearly 3.8 gigawatt (GW) of cumulative photovoltaic (PV) capacity, with the energy source producing 4.2% of the nation's electricity.

Is Next2Sun growing in Europe?

Despite difficulties in France, Next2Sun still sees growth opportunities in Europe, starting with Italy. The German agrivoltaics supplier tells pv magazine that it is also increasingly active in Japan. The Austrian manufacturer said its new heat pump is an ideal solution for industrial and district heating market segments.

Will Austria achieve 100% renewable electricity generation by 2030?

In addition to supporting PV installations through permitting simplification and cash grants, the Austrian government is targeting 100% renewable electricity generation by 2030.

What are Austria's new incentives for PV systems?

The Austrian government has introduced incentives for PV systems over 35 kW that feature made-in-Europe modules. The measure aims to create new jobs and support the energy transition, offering a 20% higher subsidy for qualifying projects.

Is Austria's new heat pump a good solution for industrial and district heating?

The Austrian manufacturer said its new heat pump is an ideal solution for industrial and district heating market segments. The system features an advanced rotor system, exploiting diffusion bonding technology, which reportedly enables higher temperature lifts, and greater manufacturability due to fewer components.

Super Sun is a lifestyle brand influenced by the simplicity of everyday life and inspires a more fun and less complicated daily routine. The core of our brand is committed to elevating everyday essentials with comfort, coolness, and quality to create timeless confidence in our wearer.

Super Solar came highly recommended by the information groups in Vo&#235;lklip, and they lived up to those glowing reports. Utterly reliable, very knowledgeable, competent and highly affordable. No amount of effort to maximize the system was spared, until we got it right the way we wanted: the tilt of the panels (22.7 degrees for Hermanus), the ...
