

Trinidad and Tobago electricity solar system

What are the solar photovoltaic systems in Trinidad and Tobago?

In Trinidad and Tobago and the wider Caribbean there is an abundance of natural energy from the sun. In Trinidad and Tobago a typical day can be insolated for 5-6 hours of sunlight. This makes the Solar photovoltaic (PV) systems very applicable for Trinidad and Tobago. The cost for these systems are constantly coming down.

Is the energy sector in Trinidad and Tobago represented on the TTSE?

The energy sector of Trinidad and Tobago, which is the main driver of the economy and the major source of revenue for the country, is poorly represented on the TTSE, with only the minor oil company, Moraven Holdings (MOV) and National Enterprises (NEL) offering any access to the local energy market.

Who is building the largest solar project in Trinidad and Tobago?

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsources to begin construction of the largest solar project in the Caribbean.

What is electricity generation in Trinidad & Tobago?

Electric Power Generation In Trinidad and Tobago (T&T), electricity generation primarily uses natural gas as the fuel source. The power generation technology used are simple cycle gas turbines and combined cycle gas turbines with heat recovery steam generators.

How much does electricity cost in Trinidad and Tobago?

The cost of electricity in Trinidad and Tobago is around \$0.05 per kWh. This relatively low cost can be attributed to the country's abundant gas resources and a subsidy on electricity.

What is the law of electricity in Trinidad and Tobago?

The Electricity (Inspection) Act is the law in Trinidad and Tobago that provides for the inspection of electrical installations, plant, apparatus and works and for other purposes in connection therewith. (Chap. 54:72)

Solar Energy is harvesting the natural energy from the sun and using that to create electricity that can be used for daily activity. This method uses the natural phenomenon of photovoltaic activity, where direct sunlight causes an electric current to occur in some materials. The complete system to harvest solar energy is called a solar array ...
