

How much electricity does Tunisia get from renewable sources?

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW). In addition to wind and hydro, the Tunisian government plans to use biogas to produce renewable energy.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

How will the Tunisian energy transition work?

The Tunisian energy transition can take multiple trajectories. In the business-as-usual scenario, large-scale projects, heavily led by foreign private companies will continue dominating the renewable energy landscape. Resistance from trade union workers and local communities will multiply, hindering the transition to clean renewable energy sources.

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and, transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

What is the law relating to renewables in Tunisia?

The law relating to renewables in Tunisia (Law No 2015-12, the "Law") as complemented by Decree No 2016-1123 and No 2020-105 (the "Decrees"), sets out the conditions and procedures for the implementation of projects for the production and sale of electricity from renewable energy sources.

Should Tunisia establish an Energy Regulatory Authority?

Tunisia should also prioritize establishing an energy regulatory authority to help enforce performance standards and strengthen the financial viability of the sector and address the governance challenges, political instability, and insufficient government commitments that are impeding private sector engagement. ( Learn more about climate finance .)

The energy sector in Tunisia includes all production, processing and, transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied

## Tunisia trinity energy

electrical/renewable energies. Renewable energy has ...

Trinity Energy has provided over 40% of South Sudan's fuel demand. More than half of the nation's fuel retailers rely on Trinity Energy's reliable supply chain to meet their clients' needs. The company owns 6 million litres of fuel storage at ...
