Are CG Power Systems Transformers reliable?

CG Power Systems transformers are renowned for their high performance and proven reliability. They are optimized to meet customer specifications with respect to energy losses, noise levels, dimensions and weight. The CG Power Systems range of transformers has achieved top rank status in terms of energy efficiency, noise level and compactness.

Why should you choose CG Power Systems?

The CG Power Systems range of transformers has achieved top rank status in terms of energy efficiency, noise level and compactness. Precise and thorough quality control before, during and after each stage of the manufacturing process ensures that all CG Power Systems products meet the very highest international quality standards.

Who owns CG Power Systems?

CG Power Systems, which makes distribution transformers for utilities such as ESB Networks, was formerly part of the Avantha Group. It is being acquired from liquidators who were appointed to its direct parent CG Power Systems Belgium, following difficulties in the wider group, reports The Irish Times.

What services does CG Power Systems offer?

CG Power Systems also offers a full range of after-sales services: it installs, repairs and maintains transformers worldwide. The company works with group service organizations in Mechelen (Belgium), France, the US, Saudi Arabia, Indonesia and Curaçao, to form a worldwide network.

What makes CG Power Systems a 'full-line supplier'?

By creating a dynamic and flexible company focused on these key points, CG Power Systems continues to operate as a 'full-line supplier' offering high performance, proven reliability and maximum return on investment for its customers. Mobile (hybrid) substations and mobile transformers up to 245kV.

What does CG Power Systems stand for?

CG Power Systems stands for innovative, high-quality, reliable transformers, respect for the environment and service to customers around the world.
