The United Kingdom relied on fossil fuels for 40% of its electricity in 2023. Its per capita emissions were below the global average, and three times lower than in 2010. The country still relies on gas for 34% of its electricity production, but its coal phase-out is almost complete with the last remaining coal plant set to close by October 2024.

While the IGEF is a high-level policy dialogue between India and Germany, the IGEF Support Office is incorporated in the structure of the Indo-German Energy Programme (IGEN). Under the Indo-German Energy Forum there are 4 sub-groups. Sub-group 1 is efficiency enhancement in fossil fuel-based power plants, Sub-group 2 is renewable energy

The United Kingdom's engagement with the Indo-Pacific reflects three broad, interrelated sets of interest: security, economic, and normative. With regard to the first, a highly combustible mix of historical and territorial disputes besets the region, including major flashpoints in the Taiwan Strait and the South and East China seas that could ...

Transporting energy generation units, from entire solar farms to exceptionally large turbine blades, requires advanced route planning solutions. DHL uses smart data and cutting-edge software systems to leverage the full potential of smart routing for optimum accessibility and cost efficiency.
