

Water leaks from photovoltaic panels installed on cave roof

What causes roof leaks after solar panel installation?

Improper installation is one of the primary causes of roof leaks after installing solar panels. If the solar panels are not securely attached or if the mounting brackets are not correctly positioned, water can seep into the gaps and result in leaks.

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Why do solar panels leak?

Older roofs or roofs with existing damage may be more susceptible to leaks under the added weight and penetration of solar panels. Flashing issues: Flashing is used to create a watertight seal around roof penetrations such as vents, chimneys, or skylights. If the flashing is damaged or improperly installed, it can cause water to seep in.

How do I know if my solar panel is leaking?

Detecting a roof leak under solar panels may not always be straightforward, but there are several signs that can indicate a problem. Keep an eye out for the following signs: Water stains or discoloration: Look for water stains on the ceiling or walls near the solar panel installation. These stains may appear as dark spots or patches.

What causes a roof leak?

There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment. These are not issues you can resolve yourself, and since your warranty would cover these issues, your first call should be to your installer.

How do I seal a leak under my solar panels?

Applying sealant is a temporary solution that can help to seal small gaps or cracks in the roof under your solar panels. This can be particularly useful when you have identified the source of the leak and it is accessible. Here are the steps to follow when applying sealant:

Yes, in many instances, solar panels can fortify and extend the life of a roof rather than cause damage or leaks. While installed, solar panels protect your roof against the elements with their hard, weather-tested ...
