

# Wave solar Palau

How will solar energy be produced in Palau?

Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility. Extensive safeguards to protect Palau's pristine environment SPEC did not leave any stone unturned to protect the pristine Palau ecosystem.

Can solar power be used in Palau?

Solar has high potential for deployment in Palau within its existing net metering regulations and financing mechanisms, and could support a reduction in fossil fuel imports.

What can Palau do to save money?

Palau is researching the potential of wind energy, ocean thermal energy conversion, wave energy, and energy storage technologies. Ocean thermal and wave technologies are in their nascent stages, although current energy efficiency and demand-side management technologies, along with wind and solar, can help save money today.

What is PV module tech USA?

PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector. The event will gather the key stakeholders from solar developers, solar asset owners and investors, PV manufacturing, policy-making and all interested downstream channels and third-party entities.
