

Is Webasto a sustainable Battery Company?

For passenger cars, Webasto develops battery systems according to customer specifications. The automotive supplier is striving to reduce the ecological footprint in the development and production of batteries. On the way to more sustainable battery systems of the future, Webasto is showing initial ideas.

Where are Webasto batteries made?

Our battery systems are developed, tested and produced in the Webasto plant Schierling in Germany- so every battery meets the very highest standards. The thermo management solutions from Webasto shorten charging cycles, extend battery life and ensure pleasant temperatures inside the vehicle.

What is a Webasto standard battery system?

For example, the Webasto Standard Battery System for commercial vehicles is equipped with a robust casing and efficient thermal management. It is particularly suitable for demanding applications such as on construction sites or off-road.

How many batteries will Webasto make a year?

The company targets manufacturing 110,000 battery modules a year and plan expanding to a capacity of 160,000 packs by 2025 in South Korea. Webasto has invested around 88 million euros in the location. Production in Dangjin started this April, now followed the official opening.

What is Webasto Charging Systems?

Webasto Charging Systems is one of the 100 leading automotive industry suppliers worldwide and the official EV charging station provider for Ford, Nissan, Fiat, Kia, Hyundai, Mitsubishi, Volvo, Chevrolet, BMW, and Mini. Webasto Charging Systems has a long track record of continuously meeting and exceeding tough automotive standards for safety and reliability.
